

# ON-SITE, VIRTUAL OR E-LEARNING?

As QRP we offer three different training-formats. You can follow one of our courses on location (your own office or a public place), in our virtual classroom or with on of our E-learning solutions.

The question however is, what is the format that best meets your needs? We compared them to simplify your choice.

## On-site training

**Full interaction**

**2-5 full days**

**Live trainer**

The onsite training is spread over a couple of **full** days, depending on the course. The exam is taken the last day of the course.

Student/student and student/trainer interaction gives a new dimension to the course.

## Virtual Classroom

**Digital interaction**

**2-5 half days**

**Live trainer**

The online live training sessions are spread over multiple **half** days, this format also includes self-study. The exam can be scheduled up to 6 months after the course.

The online learning platform is equipped with the most recent technologies, including MemoTrainer.

## E-learning

**Video interaction**

**6 to 10 months**

**Coach on request**

The E-learning format offers a 6 month access to the online learning platform. The exam is planned by the participants, once he/she finished the E-learning.

The online learning platform is equipped with the most recent technologies including MemoTrainer.
